The requirement for the interim:

1. The login and sign-up functionality must work for all users (a fully functioning authentication module).
2. The system should include all finalized and implemented UIs and must be navigable.
3. Each student must implement two CRUD operations (Create, Read, Update, and Delete), in addition to the login and sign-up features.

Time allocation: 15 minutes presentation (including the Demo) 5 minutes Q&A.

You will be evaluated under 6 points.

1. Requirements Understanding – Demonstrates an understanding of the system requirements and how the proposed system addresses them.

2. System Architecture – Proposes an appropriate system architecture.

3. Technical Exposure – Demonstrates the application of relevant technologies in the system development process and/or an understanding of the technologies required to develop the proposed system.

4.Planning - Project planning and the plan for the remaining work.

5. Overall Progress of the Project.

6. Presentation Skills & time management.
